PART 2. -- PERSONNEL

201. PAY OF CERTAIN REP-63 PERS AWAITING TRAINING.--A recent message from Chief, National Guard Bureau pertaining to REP-63 Personnel awaiting training is quoted as follows:

"1. It is not the intent to limit the effectiveness of current recruiting efforts by problems encountered in scheduling REP-63 Pers into training.

2. Accordingly, auth granted to waive the requirement to enter training within 60 days after graduation for high school students who enlisted in ARNG NLT 30 Jun 74 to receive pay prior to entry on IADT. All such persons must still enter training within 180 days after enlistment."

PART 3. -- OPERATIONS AND TRAINING

301. SCHOOL APPLICATIONS.--NGB Form 64's are coming to this headquarters without complete information in the "Additional Remarks" section. Items to be included are: FEBD; Marital Status; Withholding Exemptions; Current Duty Position and MOS; Mode of Transportation Desired; and date of last Physical Examination.

302. QUOTAS FOR 2D QUARTER FY75 FT LEWIS SCHOOLS. --A request form has been sent to all units for 2d Quarter FY75 classes at Ft Lewis. Requests are due in this headquarters by 19 Aug 74.

PART 4. -- SUPPLY

401. BELT, TROUSERS, w/BLACK ENAMEL FINISH END CLIP

USA Support Center, Philadelphia, has received several inquiries questioning the authority for issue and use of the Belt, Trousers, with Black tip (FSN 8440-573-1666). DA has approved and authorized the black belt with black enamel finish end clip for wear with both the brass and open face black buckles for all uniforms. One belt, brass tip and one belt, black tip will be issued until brass tip stocks are depleted. Following depletion only one belt, black tip will be issued.

402. FILTER ELEMENTS FOR M17 PROTECTIVE MASKS.

The NGB has received inquiries with reference to procurement and stockage of one set of M13A2 Filter Element applicable to the M17 series protective masks. Any correspondence seemingly directive in nature from sources other than NGB should be considered for information only. ARNG Units will not procure or stock these filter elements unless specifically instructed to do so by the NGB.

403. CHANGE IN FORCE ACTIVITY DESIGNATORS.

The 163d AC Regiment has been given a Force Activity Designator (FAD) of IV. Property Book Officers of units and activities should check Figure 2-2M on page 2-41, USPFO SOP for correct Issue Priority Designators (IPD's).

404. INCORRECT ISSUE PRIORITY DESIGNATORS.

Requisitioning information furnished with materiel readiness reports show that ARNG units in many instances are using improper Issue Priority Designator (IPD's) on materiel requisitions. This is particularly true in the case of requisitions for parts to support repairs on inoperable items. Too often equipment is being reported nonavailable for extended periods and repair part requisitions reflect an IPD that indicates the part is required for stockage. All requisitions should contain the IPD that correctly reflects the urgency of need.

405. RATION REQUESTS FOR WETSITE.--Ration requests for fall WETSITES will be handled in the same manner as they were during spring WETSITES. Units will prepare DD Form 1155 leaving blocks 1, 3, 4, 9, 16, 17, and 22 on blank. All other entries will be made and forwarded to reach USPFO two weeks prior to WETSITE date.

PART 5. -- FISCAL AND TRANSPORTATION

PART 6. -- MAINTENANCE

601. SECURITY CLASSIFICATION OF M551 EQUIPMENT.

In response to numerous inquiries concerning the requirements for the security of subject equipment, the following guidance, received from HQ, US Army Armor Center and Fort Knox, is provided.

a. The requirement for treating the Armor reconnaissance/airborne assault vehicle, M551 (General Sheridan) as a classified vehicle has been cancelled.

b. Confidential clearances for crew members of this vehicle are no longer required.

c. No additional physical security requirements for subject equipment are necessary beyond those normally required for a military motor park.

602. CHANGE 1 TO TM 38-750.

1. Change 1 to TM 38-750 is currently being printed and it is anticipated that it will be fielded in July - August 1974 time frame.

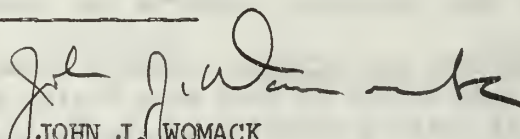

2. In order to insure consistency in materiel readiness reporting procedures and to provide sufficient time for USAMMC to program their new computer, the implementation date for this publication is 1 October 1974.

603. DA FORM 2408-9 (EQUIPMENT CONTROL RECORD).

1. A recent change required that each type of vehicular radio or radio teletype-writer be listed under one line item number regardless of the vehicle it was mounted in. The change also required redesignation of the Federal stock number. Appendix E of TM 38-750 requires submission of DA Form 2408-9 (Equipment control record) whenever the status of an item of equipment listed therein changes including a Federal Stock number change.

2. Recent information received from the NGB, states that the ARNG will not, repeat, will not, be required to submit copies of DA 2408-9 for these specific changes and that units are authorized to make pen & ink changes to permanent logbook records.
